

ENVIRONMENT

PILLAR SCORE

88%

Key takeaways

Chartwells at Brunel University is clearly committed to managing its environment impact with this pillar having the highest score of the assessment. This is evident in your work to reduce food waste by taking food that would otherwise be wasted, as well as working with the University to achieve their Net Zero ambitions. To improve in this pillar, set a reduction target for the non-organic waste you produce.

Impact Areas

Reduce Your Footprint

97%

Encouraging you to reduce your environmental footprint - from greenhouse gas emissions to energy use, water use and pollution - and so minimise damage to the environment and to human health.

Waste No Food

87%

Focusing on what you're doing to fight food waste, through reducing, reusing, redistributing and recycling.

Reduce, Reuse, Recycle

80%

Looking at what you're doing to reduce, reuse and recycle non-organic waste.
